

Internet Proxy Settings

To accelerate/enhance/control/log/report our internet traffic, we employ a “proxy”. Your browser is the program you browse the internet with. Many believe IE Internet Explorer is the only way to the internet, however, we prefer Mozilla Firefox or Netscape for security reasons. The following doc will explain how to set your proxy correctly for each.

Internet Explorer (the blue E)

Tools>Internet Options>Connections>LAN Settings

Mozilla Firefox

Tools>Options>Connection Settings
